

NEL ECF Program Briefing Chat Messages

<p>Can Cohort 3 switch providers for Year 2 induction?</p>	<p>Yes. A school recruiting a Y2 ECT is encouraged by the DfE to retain the original Lead Provider. However, if the school determines that it is the best interests of the ECT to move to a different Lead Provider that is acceptable.</p>
<p>I have two legacy ECTs who started on the ECF in January 2023. So their last term will be the one starting September 2024. They are still registered with LBWF as AB. What will their status be if I move over to REP/HEP as provider?</p>	<p>HEP and REP are Delivery Partners with UCL for ECF. The arrangements for AB provision may be with the local TSH or a different TSH signposted through REP or HEP.</p>
<p>If we choose to use UCL for ECF training, do we need to choose between HEP or REP dependent on our location?</p>	<p>HEP and REP are UCL Delivery Partners within North-East London. They will align their coverage to best serve the area and your selection of one or the other is best done through direct communication with them.</p>
<p>Is there someone whom I can call and speak to about this briefing, as have a few questions?</p>	<p>The contact details are: REP – Bob Drew (0208 550 1803) ECFdirect@repmail.co.uk HEP – Anne Etchells (020 3967 987) anne.etchells@haringeyeducationpartnership.co.uk</p>
<p>I am the Induction Tutor for Leytonstone School. We have signed up with REP as our delivery partner. How do I sign up to HEP for the AB?</p>	<p>Details of registering with your choice of AB will be sent out shortly, including an easy step-by-step guide.</p>
<p>When will HEP know if they can act as an AB?</p>	<p>Only TSHs can offer AB services, but HEP are looking to work as a third party to be able to support an AB offer. We are in the final stages of confirming arrangements and will be able to share details before the Portals open for onboarding.</p>
<p>Can REP be our delivery and our AB?</p>	<p>REP is already a delivery partner. We will be explaining the options you have for choosing an AB shortly, however REP will not be directly offering AB support.</p>
<p>Will you create a how to guide for transferring and adding ECTs.</p>	<p>Yes, we will be publishing an easy to follow guide with screen shots in the coming weeks. At the moment the Portals for onboarding and registering your ECTs are not operational. We will share the date with you in advance along the guide on what steps to take to make a successful registration.</p>
